A. CONTRACT CHANGES:

The Bid Schedule has been revised to reflect Option Period One for Item 0002 and Option Period Two for Item 0003.

Clause 52.215-4017 COEFFICIENT APPLICATION EXAMPLE is corrected to read: An example of how the coefficients are applied in accordance with the solicitation follows:

- a. Once the elements of work not excluded from the R. S. Means Building Construction Cost Data 2004 are priced, use the BARE COSTS TOTAL column for the line items of work to be performed by the offeror.
- b. As an example, if the R. S. Means Building Construction Cost Data 2004 price is \$100,000 for materials, equipment and labor, and the weighted average city index adjustment factor for Fayetteville, NC from the R. S. Means Building Construction Costa Data 2004 of 74.7 is applied, the result would be a sub-total task order price of \$74,700. The contractor determined coefficient is then applied to the sub-total task order price. For example, if the contractor determines his coefficient to be 1.100 and it is applied to the sub-total task order price of \$74,700 the final task order cost (including all indirect and profit costs) would be \$82,170.
- c. The current year edition of R. S. Means Building Construction Cost Data and the corresponding current year weighted average city adjustment factor for Fayetteville, NC will be incorporated as stated in Clause 52.215-4008 UNIT PRICE BOOK.
